

November 20, 2009

Dear Educational Colleague:

The New Jersey Society of Professional Engineers Educational Foundation invites your school to participate in the 41st annual Engineering Career Day on Wednesday, March 17, 2010. This program will be held once again in the Science & Engineering Resources Center at the Rutgers College of Engineering on the Busch Campus in Piscataway, New Jersey.

We organize Engineering Career Day as a public service to high school students to introduce them to career opportunities available in engineering. This program is supported by corporate sponsors, public authorities, local colleges and universities. More details about the program are contained in the attached Program Outline. This program is very beneficial to students, especially Juniors, at a time when they are making career decisions, particularly as they relate to the selection of a college and their area of study.

For your students to benefit from this experience, those selected from your school should have the qualifications for pursuing an engineering program and an interest in learning more about the opportunities of an engineering career. With increasing emphasis on STEM educational initiatives, this field trip would be an excellent extension for additional engineering information for qualified students.

In addition to the program outline, we have enclosed a registration form. The registration should be completed and returned to us by March 3, 2010. Your timely response is needed as space is limited to approximately 400 students and advisors. Please also note that lunch is included.

Each group of students must be accompanied by at least one advisor. The charge for attending is \$10.00 per person (student or advisor). A check or purchase order must accompany the registration form and be made payable to the ***NJSPE Educational Foundation – Career Day***.

Registration confirmation letters will be mailed to the advisor listed on the registration form prior to the event, provided that the registration form is received by the March 4th deadline. Confirmation letters will include directions to the event. Should you have any questions, please e-mail Michael Testa, P.E. at MTesta@co.ocean.nj.us. Please note that the schedule has been pushed back a half-hour from previous years.

Sincerely,

Michael A. Testa, P.E.
